EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The following in claim 25 has been changed to correct an obvious typographical error:

Claim 25, line 9; Change "fo" to "of".

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach and/or suggest an electrode having a porous elongate hollow body of TiO_x having a connection means of a plurality of electrically conductive portions distributed along the length of the electrode to cause current flow through the body in an evenly distributed manner along the length of the electrode. The prior art further fails to disclose an electrode of the above construction wherein the hollow body has an electrical resistance along the body of 280 milli-ohms or more. Applicant has provided support in the specification with respect to the inner and outer diameters of the body and the lengths of the body being 200 mm long in an original claim and at least 200m long and a specific example of 500 mm long in the specification. Applicant in their instant response show how the calculation of the

resistivity is obtained from these dimensions. Therefore, no new matter has been introduced.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
